A SELECTED BIBLIOGRAPHY OF PUBLICATIONS, 1949–1972

PREFACE

This bibliography represents a selection of Institute publications and published research of Institute faculty over the past twenty-five years. Naturally, it is impossible to include all the essays, position papers, and research reports produced over such an extended period of time. The selections included here represent the major areas in which we have conducted research and include major Institute papers plus at least one paper by the many individuals who have been affiliated with the Institute since its founding in 1947.

Many of the people whose works are included have left the Institute for other positions in government, industry and academic life. We have included some portion of their research, published and unpublished, carried out while on the Institute's staff. In a few cases we have included entries of work completed immediately prior to joining the Institute when an individual author wished it to be included and when it represented work that led to an invitation to join in the Institute's research program. We have included in the appendices current addresses of former Institute members as well as a listing of the current staff.

Persons wishing individual copies of any of the entries are encouraged to write directly to the authors at their current addresses. A number of Institute publications are available free of charge or at a nominal cost. We will also attempt, limited of course by availability, time, and resources, to provide Xerox copies of papers currently out of print.

The bibliography is the work of many people but particular citation should be given to Judith Graham who was the principal bibliographer, to J. Nicholas Goodban and Joseph Wrobel who assisted in the compilation, and to Joanne Berbaum, Kathleen Meyer, Wanda Morrison, and Lorraine Selander who graciously endured the tedious process of typing, arranging, and corroborating the citations.
